# Vignesh N

**vignesh.nainamalai@gmail.com • +91 9944775518 • Bangalore • Linkedin.com/in/Vignesh-n**

## Summary

**Software Development Engineer II** with **4+ years of experience** across **Manhattan Associates** and **Nike**, designing and operating scalable high-throughput **distributed microservices** and full-stack enterprise applications. Specialized in **Java, Spring Boot, Microservices, Kafka, REST APIs** and **React** with strong expertise in **Data Structures** and **Algorithms, System Design** and Cloud-Native Development. Owned end-to-end feature delivery, **asynchronous workflows, CI/CD automation** and production reliability, driving **50% latency reduction**, 40% storage savings and **25% increase in engineering productivity.**

## Skills

**Languages and Concepts:** Java, Python, SQL, JavaScript, Data Structures and Algorithms, Object-Oriented Programming, Design Patterns, Multithreading, High-Level Design, Low-Level Design

**Backend and Systems:** Spring Boot, Spring MVC, Microservices, REST APIs, Kafka, RabbitMQ, Hibernate, JPA, Event-Driven Architecture

**Frontend and Databases:** React, React Native, HTML5, CSS3, TypeScript, Redux, MySQL, PostgreSQL, DynamoDB, Aurora, Redis

**Cloud and DevOps:** AWS (Lambda, ECS, SQS, S3, DynamoDB), GCP, Docker, Terraform, GitHub Actions, Jenkins, Maven, Gradle, Git

**Monitoring and Tooling:** Kibana, OpenSearch, Splunk, Grafana, PagerDuty, JUnit, Mockito, Postman, Swagger, GitHub Copilot, Cursor

**Practices:** Agile, Scrum, TDD, System Design, Code Reviews, Production Support, Release Management

## Work Experience

**Software Development Engineer II, Nike -** *Bangalore, Karnataka, India* **Nov 2025 - Present**

- Engineered a cloud-native Returns Receiving platform for warehouse Distribution Centers (DCs) using Java 21, Spring Boot 3, Kafka, AWS Lambda, SQS, DynamoDB, Aurora MySQL and S3, achieving 90-second end-to-end unit handling (50% faster than the legacy Manhattan Active Warehouse Management System (WMS) workflow) by designing fault-tolerant, resilient asynchronous event-driven pipelines that decoupled inventory bookkeeping and improved system scalability and reliability.
- Built a scan-driven React web application and a React Native Android application running on Zebra handheld scanners for warehouse operations, cutting operator actions by 50% via a guided workflow and one-tap grading.
- Provisioned AWS infrastructure with Terraform across 2 regions, deploying 15+ resources (ECS, Lambda, Aurora MySQL, DynamoDB, SQS) with AWS Systems Manager (SSM)-based config, cutting provisioning time from 2 days to 20 minutes.
- Established CI/CD pipelines using GitHub Actions and integrated Cursor Bug Bot AI-assisted code reviews with severity-based quality gates, enabling weekly production releases and reducing main-branch defects by more than 30%.
- Mentored 3 junior engineers on distributed systems and Spring Boot while leading code reviews for Returns platform features.

**Software Engineer, Manhattan Associates -** *Bangalore, Karnataka, India* **Sep 2022 - Nov 2025**

- Architected and maintained RESTful APIs using Java 8, Spring Boot and Spring MVC for the Manhattan Active Warehouse Management System (MAWM), serving frontend and mobile clients with paginated endpoints and structured error handling.
- Deployed and scaled 8 Spring Boot microservices on Google Cloud Platform (GCP) using Kubernetes with horizontal autoscaling and rolling deployments, powering high-availability MAWM workloads across 200+ warehouses.
- Resolved 40+ P1/P2 production incidents in Jira with sub-45-minute Mean Time to Recovery (MTTR) and managed 12+ Jenkins CI/CD pipelines with Nexus repositories for zero-downtime Docker deployments.
- Optimized database performance, reducing storage by 40% and query latency by 20%, via scheduled JPA/Hibernate purging, Fork/Join parallel processing and SQL query tuning across high-traffic warehouse services.
- Designed and owned an internal code-generation tool that scaffolded Java REST controllers, service layers and JPA repositories, reducing boilerplate by 25% and accelerating team production rollouts.

**Software Engineering Intern, Manhattan Associates -** *Bangalore, Karnataka, India* **Jul 2022 - Aug 2022**

- Customized and enhanced the MAWM mobile UI using Java 17, Spring Boot, Groovy DSL and Apache Velocity templates; built Jasper Reports and label-generation solutions that increased user engagement by 20% and improved operational efficiency.

## Education

**Anna University**, Chennai, Tamil Nadu, India **Aug 2018 - Jun 2022**

Bachelor of Engineering (B.E.) in Electronics and Communication Engineering (ECE) CGPA: **8.33/10**

***Projects***

- Architected a microservices-based e-commerce platform with Authorization Service, Order Service and Payment Gateway Integration using Spring Boot, Spring Security and JWT, handling end-to-end order workflows with secure payment processing.

## Certifications

- AWS Certified Cloud Practitioner, Amazon Web Services, Credential ID: 1FDXERELYFV4QV9F
